Gary W. Bucek, a long time proactive entrepreneur, owner, and past president of a manufacturing company with over 25 years of experience is running for Texas House of Representatives, District 29. He believes his past experience in business and production management, technology, and finance added to his common sense approach to solving problems will enable his success.

When it comes to education, we must start defining success by how much a child learns and not by how much money state bureaucrats spend. Education should be about results, not process. I believe we should support educational programs that succeed and abolish or fix those that fail. I believe we should have an education system that allows parents and children to choose their own path with a more customized curriculum. We have a responsibility to provide every child with an opportunity to learn how to think and to succeed.

I also believe schools should help teach children right from wrong. A system that teaches civility and respect, and of values. And, I support every child's right to pray in school.
